

TRIGGERSTART™ AUTOMATIC ON/OFF TECHNOLOGY

- 1 While the pressure washer is OFF pull the trigger on the gun.
- 2 After 3 seconds the pressure washer will automatically turn ON.
- 3 Proceed pressure washing as normal. *It's that easy!*

Trigger Start™ Technology...What is it? Trigger Start Technology utilizes a flow switch connected to an ignition control module that automatically starts and stops the engine. The flow switch detects when the gun trigger is either pulled or released by monitoring water flow through the pump. When the trigger is pulled the flow switch senses water flow and signals the control module to start the engine. When the trigger is released the flow switch signals the control module to wait 15 sec. and then turns the engine off. If the trigger is pulled before the 15 sec. is up, then the engine continues to run normally. This allows the user to stop momentarily without the engine turning off. Simple design. Reliable construction. Intuitive operation.

Model #	76522	71121	71321
PSI	3000	3600	4000
GPM	2.5	3.0	4.0
Start Type	Trigger Start™ / Electric / Recoil		
Engine	196cc	338cc	389cc
Pump	Axial Cam	Crank Shaft	Crank Shaft
Quick Drain™	Yes		
Fuel Capacity	3.8 gal.	5.9 gal.	5.9 gal.
Frame Style	Full Cage- 1 in.	Full Cage - 1.25 in.	Full Cage - 1.25 in.
Wheel Kit	8 in. Never Flat	10 in. Never Flat	10 in. Never Flat
Hose	25 ft. - Quick Connect	50 ft. - Quick Connect	50 ft. - Quick Connect
Gun	Standard - Stainless Steel Lance		
Nozzle Style	Quick Connect		
Nozzles Included	15°, 25°, 40°, Detergent		
Detergent	Low Pressure Chemical Injector		
Battery	12V DC 9Ah	12V DC 15Ah	12V DC 15Ah
Warranty	1 Year Parts & Labor
