

# MYSTICWASHER®

## The power washing system that changes everything...

# Now you can power clean flat and vertical surfaces faster and safer than ever before!

The Mystic Washer® is totally self-contained: just hook up to a water source, start the 390cc Honda engine and start cleaning.

- Up to 80% faster than wand cleaners
- Up to 40% faster than so-called 'spinners'

The ultimate in versatility, the Mystic Washer® offers a host of industry-leading features:

- Includes an attached professional-grade wand as standard equipment. Turn a knob to wand-clean verticals, get up stubborn gum spots, remove graffiti or give the jobsite a final rinse.
- True 4,000 psi and lower cleaning.

You get a true 4,000 psi since there is no loss due to long hose lines. Or, dial down the standard 4,000 psi for cleaning more sensitive surfaces like wooden decks.

- Operate during the day around pedestrians! Contractors, municipal agencies, schools, theme parks: All love their Mystic Washers®! This is the only power-washer many need since it handles both flat and vertical surfaces like no other machine.

**Mystic Washer® WR model reclaims up to 98% of dirty cleaning water!**

Then, add our vacuum and recycling filtration systems to reuse your wash water over and over. Comply with environmental regulations for wastewater disposal.
