

NEW Hydro Twister Surface Cleaner

Hydro Tek is pleased to announce the new 24" deck Trident Hydro Twister® Series Surface Cleaner. This surface cleaner is constructed of stainless steel with a hardened aluminum rotary arm and a brush skirt to contain overspray.

Three non-marking casters offer the convenience of free movement to wash side-to-side or in a straight line.

The proprietary hardened aluminum spray arm with compound angled nozzles not only cleans "up to the edge" but also pushes standing water aside to allow more surface impact with no zebra striping.

A brush skirt reduces splash on operator and nearby objects such as cars and windows. Beefy 3/16" caster brackets along with the stepped stainless steel deck result in a durable Surface Cleaner that will outlast most that cost much more.

Connection is via 22MM twist coupler / Gun not included.

MAX Rating: 5000 PSI / 210°F / 6 GPM
