

Model G 2800 XH

Introducing the all new **Expert Series** from Kärcher! After interviewing pressure washer users around the country, we designed our new G 2800 XH from the ground up with the most requested features, including convenient **quick connect couplings** for the high-pressure hose and a **bonus storage area** that allows you to conveniently store accessories and personal effects while you clean. The result is a pressure washer that is unmatched in quality and design.

The G 2800 XH sports many additional industry-leading features, including an **oversized detergent tank**, a folding handle for easy storage and an upright, ergonomic frame with 10" pneumatic tires and metal wheels. As with our other G-series pressure washers, the G 2800 XH uses technology borrowed from our successful line of commercial products, including a **commercial-grade pump with brass pump head** developed exclusively by our German engineers. (The same pump technology was used by Kärcher to clean the presidential faces on [Mount Rushmore](#).)

The G 2800 XH is also equipped with a reliable, easy to start **Honda GC190 engine** and a complete set of five patented Pro-Style nozzles. The folding handle makes it easy to lift and transport the unit. **Tie down slots** keep it anchored during transport. The closed position provides cage protection for both transport and storage.

The G 2800 XH represents great value, offering German engineering, Honda reliability and a unique design that is rugged, attractive and stands out from the crowd. Check out the all new Expert Series from Kärcher today!
