

Selection Overview

Choosing a product that is powerful and durable enough to fit your cleaning needs is key. The heavier the duty level, the longer lasting and more powerful the cleaning machine is.

PSI is the water pressure that gives you the power to penetrate the dirt and grime.

GPM is the water flow that gives you the power to break down the dirt and wash it away.

Pressure washers are rated in accordance to PWMA standards.

2600 PSI 2.3 GPM	3000 PSI 2.5 GPM	3800 PSI 4.0 GPM
