JETTERS | DRAIN CLEANERS FOR PLUMBING PROFESSIONALS AND RENTAL MARKET

SHARK JETTERS: Powerful and proven drain cleaning machines

With over 15 years experience manufacturing jetters, Shark now introduces 7 high-pressure jetter models to the plumbing, rental, jan san and MRO markets.

Field-tested by professionals and the rental industry, Shark Jetters have the power to effectively break through tough drain blockages caused by grease, dirt, sand, debris, and even ice. The Shark Jetters product line includes 3 electric and 4 gas engine models, ranging from 1.7 to 8 GPM flow, and sized to clear blocked drains from 1 1/2" lines up to an 8" pipe.

Engineered for safety, Shark Jetters are ETL certified to UL-1776 safety standards and come with many safety features including a thermal relief valve, back flow check valve and inlet filter. Built for power and performance, Shark Jetters provide a high return on investment thanks to their durable design and proven engineering.

As with Shark Pressure Washers, all Shark Jetter production plants are ISO 9001 certified.

PULSE Technology

Shark's unique Pulse Technology was engineered to do the hard work so you don't have to. The pulsating action breaks the friction between the hose and pipe, allowing the hose to move easily through the pipe, especially around tight curves.
