2 QT REMOTE CUP

Need higher material capacity? Now you can transform your turbine system into a high capacity sprayer without adding the cost and weight of a bulky air compressor. The CAPSPRAY Remote Cup System enables you to increase spraying time between refills. For use with CAPSPRAY 75–115 sprayers.

- Doubles the reservoir capacity of standard HVLP guns
- Reduces fatigue by removing the weight of the coating material from the gun
- Easier to paint inside cabinets and other hard to reach areas
- Elimination of the spray cup allows for upside down spraying
- Weighs less than competitive two quart systems
- No external compressor required

The perfect tool to maximize application capabilities and opportunities while minimizing strain and fatigue.
